

### **STANDARD 3**

#### **Educators have knowledge of student growth and development**

**Evidence:** Webquest

**Reflection:** For this evidence I chose our group webquest, because it highlights a clear understanding of curriculum, 21<sup>st</sup> Century Learning, student development, and growth. The webquest is an interactive and exciting way to explore subject matter.

This webquest involves working in small groups, creating a concrete piece of evidence as an end result/celebration of learning, is multimodal, integrates technology, and is cross-curricular. Students from multiple intelligences can be engaged equally.
