

### **STANDARD 3**

#### **Educators have knowledge of student growth and development**

**Evidence:** Gifted Learners Resource

**Reflection:** Another piece of evidence that has been sourced from professional collaboration is the Gifted Learners Resource compiled in our Inclusive classroom: The Special Needs Learner course.

This is a comprehensive resource that demonstrates my understanding of the importance of meeting students differentiated needs in a classroom environment. The package contains background information, important steps to take when assessing and making recommendations for students, barriers students might face, and links to Ministry guidelines around how to address the needs of Gifted Learners in the classroom.
