

## **STANDARD 7**

### **Educators engage in career long learning**

**Evidence:** Mathematics Best Practices Essay

**Reflection:** This essay was written as a reflection after the Math in Bloom Conference in 2012, with connections to our psychology class, and theory of learning. I have chosen this as evidence for this standard because of the depth of personal reflection, it's an exemplar for how I engage in professional development, and demonstrates my understanding that professionalism develops over time when informed by theory and practice.
